

Professional Websites For Your Growing Businesses

HELPING YOUR BUSINESS GROW ONLINE

Modern • Customized • Mobile-
Friendly

Websites built around your business.

Webloom Studio 360 is a modern website design service focused on helping businesses build a professional and engaging online presence. We create responsive, customized business websites that showcase your services, brand, work, and contact information in a clear and attractive way.

From the initial design to website launch and basic search-engine setup, we aim to make the process simple and convenient for business owners. Every website can be tailored to the client's preferred colors, style, content, and business requirements. Our goal is simple: to turn your business into a professional digital presence that customers can easily discover, explore, and connect with.

Ideal for

- Dental clinics & healthcare businesses
- Salons & beauty businesses
- Restaurants & cafes
- Boutiques & small shops
- Consultants & professionals

Also suitable for

- Architects & designers
- Photographers & creatives
- Local service providers
- Small hotels & homestays
- Coaching & tuition centres

OUR FOCUS

A professional online presence without unnecessary complexity.

For businesses that need their services, work, location and contact details presented beautifully online - without logins, customer accounts, payment systems or complex databases.

WHAT'S INCLUDED

Everything customers need to know.

Standard features can be adapted according to the business and package selected.

01

Home

Strong first impression, key information and clear calls to action.

02

About

Business story, team, trust factors and background.

03

Services

Organized presentation of treatments, services or offerings.

04

Gallery

Photos, projects, interiors, products or previous work.

05

Contact

Phone, email, WhatsApp and other contact information.

06

Location

Google Maps/location section and business hours.

07

Social Links

Instagram, Facebook, YouTube and other relevant profiles.

08

Responsive Design

Designed to work across phones, tablets and computers.

Call and WhatsApp buttons can be placed prominently so visitors can reach the business easily.

Designed your way. Prepared for search.

Customization

Your website can be adapted to your brand and ideas.

- Brand colors & logo
- Typography & visual style
- Custom sections & page structure
- Image layouts & galleries
- Buttons, icons & call-to-actions
- Business-specific content arrangement

SEO & Search Setup

We prepare the website using basic SEO best practices.

- Search-friendly page structure
- Page titles & meta descriptions
- Proper headings & image alt text
- Sitemap & robots.txt
- Google Search Console setup
- Indexing submission & basic local SEO

Built with security in mind

Websites are developed using security-conscious practices and deployed using reputable modern hosting infrastructure with HTTPS. We avoid unnecessary complexity and do not expose sensitive credentials in client-side code.

IMPORTANT NOTE

Search visibility can be improved through proper setup, but Google rankings and traffic cannot be guaranteed.

What We Need From You

- Business name and contact details
- Logo and brand information
- Service/business details
- Photos and other business images
- Social media links
- Location and business hours
- Any specific design preferences or ideas

IMPORTANT NOTE

We can help organize and present your content, but final business information and materials must be provided or approved by the client.

Flexible Pricing

Each website is quoted according to the required pages, features, customization and content. Contact us for a personalized quote.

Review

Each project includes a limited number of revision rounds as agreed during the quotation. Additional revisions may be quoted separately.

Client- provided images and content are preferred. Licensed/stock visuals can be arranged when required and may be quoted separately.

DOMAIN + PROCESS

From idea to live website.

Domain setup

Already have a domain? We can connect and configure your existing domain.

No domain yet? For new websites without an existing domain, Webloom Studio 360 covers the first-year domain registration for the selected domain. From the second year onward, renewal costs are paid by the client.

Website Hosting ? Websites are deployed using modern hosting infrastructure. Hosting arrangements and any applicable recurring charges will be discussed based on the project.

OUR PROCESS

01. Understand

Learn about the business, customers and goals.

02. Plan

Structure pages, content and the user journey.

03. Design

Create the visual direction around the brand.

04. Develop

Build the responsive website.

05. Review

Client review and agreed revisions.

06. Launch

Connect the domain and publish the website.

Optional services

Maintenance • Content updates • Additional pages • Additional revisions • SEO support • Google Business Profile assistance • Redesigns

Optional services are quoted separately based on the project.
